## Thermal Efficiency Credentials

# UPGRADED

The **XtremeDoor** is 17% more thermally efficient than a traditional timber door and 19% more thermally efficient than a composite door manufactured with a timber core.

## SECURITY

- 67% of burglars target the door as means to break into a home.
- Our door has stood up to a number of real life break in attempts and come out on top.
- Greater Manchester Police have also tested our doors at their own access training centre.
- XtremeDoor can be upgraded to Police approved 'Secure-by-Design' specification on request.

## KERB APPEAL
